## DESCRIPTIONS

**Analysis and recognition** v-LANE A12D8HP is the intelligent 12Mpixel OCR - 8 Mpixel context double head camera, able to control and manage all the problems of a high-speed road crossing; detects up to 42 images per second at a depth of 12bit, within which it analyzes, identifies and validates the license plates of the vehicles present. also thanks to the powerful double illuminator that works effectively up to 30 meters in all light conditions. This result obtained through the use of sophisticated software makes it possible to read the license plate of vehicles in transit at speeds of up to 320 km/h in free-run mode (without an external trigger device).

**Data** Data and images can be stored directly locally, sent to the customer's supervision system or sent to the v-SUITE supervision platform. The device has FTP, XML-RPC (on HTTPS) and serial transmission protocols. Software Optical Character Recognition (OCR) library complete with 41 countries in Europe, 13 Asia, 6 Africa, 5 South America and special plates such as Trailers, Kemler ADR, Kemler ADR Empty, Trams (Police, Army, Ambulance, Civil Protection... ).

**Classification** The camera is equipped with a video classification software capable of recognizing vehicle types with 11 + 1 classes including (Cars, Trucks, Trucks with trailers, Motor vehicles, Motorcycles, Mopeds, Buses, Mini vans, Big vans, Box bodies, Caravan, unknown); it is also able to identify the dominant color among a range of 11 colors + 1 (black, white, gray, red, blue, yellow, green, orange, pink, purple, cyan, unknown). v-Lane is equipped with gate AID algorithms for traffic control (stationary vehicle, wrong-way vehicle, slow traffic, queue).

**Data security** The storage and transmission of data generated by the product takes place using highly reliable and secure protocols, guaranteeing the highest level of inviolability and privacy. Vigilante complies with the most restrictive regulations on data security such as ISO27001:2022 and ISDP10003:2018 - Privacy by Default and Privacy by Design.

**Application examples** Highway control and high-traffic streets Basis for enforcement systems
